Authorization to Release Academic Information

Student Name (Please Print)

Student Social Security Number

has applied to participate in a College Access Program at BGSU Firelands. By signing below, we authorize the University to release academic record information, including but not limited to grades and enrollment information, to the High School, School District and other parties prescribed by the laws of the State of Ohio. In so doing, the University may use the Social Security Number as an identifier. We also authorize the University to release Directory Information consistent with the Family Educational Rights and Privacy Act (1974) and the Bowling Green State University Student Code.

Parent / Guardian Name (Please Print)

Relationship to the Applicant

Student Signature _____

Date ____ / ____ / ____

Parent / Guardian Signature _____

Date ____ / ____ / ____

Refusal to sign this release precludes participation in any College Access Program at BGSU Firelands.

If you wish to release academic records and/or information to any other party, please attach additional copies of this form, noting their name and relationship to the student in the spaces provided above.

Please read the following document carefully before signing. This is a legally binding document.

The BGSU communication network is an electronic computer network with access to the Internet. The Internet is an electronic highway connecting thousands of computers all over the world and millions of individual subscribers. BGSU Firelands, therefore, has access rights to: electronic mail communication with people all over the world; information and news from, as well as the opportunity to correspond with, research institutions; public domain and shareware software of all types; discussion groups on a plethora of cultural, political, scientific, and general or special interest topics; and access to many universities, libraries (including the Library of Congress), non-profit organizations, commercial companies, etc.

Along with access to computers and people all over the world comes the availability of material which may not be considered to be of educational value within the context of an educational setting. BGSU Firelands firmly believes that the valuable information and interaction available on this worldwide network far outweigh the possibility users may procure material inconsistent with educational goals for the Firelands Campus or the network.

Internet access is coordinated through a complex association of government agencies, regional, and state networks. The smooth operation of the network relies upon the proper conduct of the end-users, who must adhere to strict guidelines. These guidelines are provided here so the user is aware of the responsibilities associated with the use of this network.

In general, network use requires efficient, ethical, and legal utilization of the network resources. If any users violate any of these provisions, their accounts with BGSU Firelands can be terminated, and future access could be denied. The signatures at the end of this document are legally binding and indicate the parties who signed have read the terms and conditions carefully and understand their significance.

PURPOSE

The purpose of the NSFNET (National Science Foundation Network), the backbone network to the Internet, is to support research and education in and among academic institutions in the U.S. by providing access to unique resources and the opportunity for collaborative work. Use of other organization=s networks or computing resources must comply with rules appropriate for that network. Listed below are the acceptable and unacceptable uses of the BGSU network.

ACCEPTABLE USES OF THE BGSU NETWORK

1. Communication with foreign researchers and educators in connection with research or instruction, as long as any network that the foreign user employs for such communication provides reciprocal access to U.S. researchers and educators.
2. Communication and exchange for professional development, to maintain current, or to debate issues in a field or subfield of knowledge.
3. Use for disciplinary-society, university-association, government-advisory, or standard activities related to the user=s research and instructional activities.
4. Use in applying for or administering grants or contracts for research or instruction, but not for other fund raising or public relations activities.
5. Any other administrative communications or activities in direct support of research and instruction.
6. Announcements of new products or services for use in research or instruction, but not advertising of any kind.
7. Any traffic originating from a network of another member agency of the Federal Networking Council, if the traffic meets the acceptable use policy of that agency.
8. Communication incidental to otherwise acceptable use, except for illegal or specifically unacceptable use.

UNACCEPTABLE USES OF THE BGSU NETWORK

1. Transmission of any material in violation of any U.S. or state regulation is prohibited. This includes, but is not limited to, copyrighted material; threatening or obscene material; or material protected by trade secret.
2. Use for-profit activities or use by for-profit institutions.
3. Use for commercial transactions, product advertisement, or political lobbying.
4. Any malicious attempt to alter, destroy, or reduce the usability of data of another user, agency, or network connected to BGSU, Firelands Campus, Bowling Green State University, or the NSFNET Internet backbone will result in the cancellation of privileges. This includes, but is not limited to, the uploading or creation of computer viruses, worms, trojan horses, etc.

WARRANTIES, LIABILITIES, AND SECURITY

BGSU Firelands makes no warranties of any kind, expressed or implied, for the service being provided and will not be responsible for any damages suffered, including loss of data resulting from delays, non-deliveries, misdeliveries, or service interruptions caused by negligence, errors, or omissions. BGSU Firelands specifically denies any responsibility for the accuracy or quality of information obtained through the network services; use of any such information is at the user=s risk.

Security on any computer system is a high priority, especially when the system involves many users. Individuals identifying a security problem on the BGSU computer networks have the obligation to notify the system administrators at the earliest possible time. Attempts to logon to the system as any other user will result in cancellation of privileges. Any user identified as a security risk or having a history of problems with other computer systems may be denied access.

Electronic mail (E-Mail) is not guaranteed to be private; system administrators and operators can access mail and mail software may misdirect messages. Messages relating to or in support of illegal activities must be reported to the appropriate authorities.
