Diagnostic Medical Sonography Program

FAQ

When does the DMS program begin?
The DMS program begins once a year starting in the fall semester each year.

How long is the program?
The program is a 24-month associate’s degree program.

Where are the clinical sites located?
Clinical sites vary each year due to hospital/clinic availability. The majority of clinical sites are within one (1) hour to 1 ½ hours from the BGSU Firelands, although some clinical sites are farther. Students must provide their own transportation to and from clinical sites.

How often do students attend their clinical site?
The students are at their clinical site two (1-3) days per week during spring/summer semesters of their first year. Students are at their clinical sites three (3-4) days a week their second year in the program. Clinical rotation days and times may vary.

Can I select my clinical sites?
Clinical sites are assigned by the Clinical Coordinator and not selected by students.
What are the prerequisite requirements to get into the sonography program?

English GSW 1120
Mathematics MATH 1220, or 1150, or 1200 or STAT 2000
Medical Terminology AHS 3010 or AHTH 1100
Human Anatomy and Physiology BIOL 3310 AND BIOL 3320 (preferred) or AHTH 1310
Physics: RADM 1410 or PHYS 1010 or 2010

What are the steps to apply?

First apply to BGSU Firelands. Begin completing the prerequisites requirements. If you have course work at another institution, determine through admissions what previous courses will transfer. BEGIN THIS PROCESS EARLY TO ALLOW ENOUGH TIME TO PROCESS!!

If you have completed the prerequisite courses complete the DMS application before the deadline. Courses maybe in progress, but must be completed before program begins. A preference is given to students with all prerequisites completed.

Complete a 4-8 hour job shadow of a sonography department. Complete the clinical observation form (obtained from Program Director) and turn in with application.

When should I apply for the sonography program?

Admission application deadline for the 2015 admitted class is February 9, 2015

How are students selected?

Admission to the program is highly competitive. Students are ranked on GPA and courses completed. The top ranked students are invited for an interview in spring. The class is then selected for the following fall.
How many students are selected?

Class size may vary year-to-year based on the availability of clinical affiliations and seats.

Can I work while I am a student in the program?

Working during the program may be difficult. The program is academically intense and the amount of time a Sonography student must spend in the program and study time is significant. You should plan ahead for your financial situation. The amount of absences allowed is very low. It is also very important to have reliable and dependable transportation to and from clinical rotations.

If I have other questions, who should I contact?
