Program Effectiveness Data
2013

Reports as defined by the Joint Review Committee on Education in Radiologic Technology (JRCERT) www.jrcert.org are program completion rates, credentialing examination pass rate and job placement rate.

The radiography program’s annual report reflected the following:

Completion Rate – January 1 through December 31, 2013
This is the number of students that began the program divided by the number of students that actually completed the program. Twelve students completed the program out of the fifteen expected students. The program’s completion rate was 80%.

Credentialing Examination Pass Rate – 2009 through 2013
This is the number of students passing the American Registry of Radiologic Technologists (ARRT) certification examination on the first attempt within six months of graduation from the program. The pass rate is an average of five years. Fifty three of the sixty-eight students graduating from the program between 2009 through 2013 passed on their first attempt within six months of graduation. The program’s five year average credentialing examination pass rate on the first attempt was 78%.

Job Placement Rate – 2009 through 2013
This is the number of students that find employment within the radiologic sciences within six months of graduation. Results are based on students actively seeking employment. This number is an average over five years. The program’s rate of reported employment averaged from 2009 through 2013 was 92%.
